DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 36-37, 39, 43, 45-46, 48 and 49 are rejected under 35 U.S.C. 102(b) as being anticipated by Schaefer '618.

Schaefer discloses in figures 1-8 a medical treatment article comprising at least one fluid control film component 11, having at least one microstructure-bearing surface (the lower surface of 11), with a plurality of microreplicated channels 13 extending along the surface the permit the transport of fluid between a medical site and A patient, a remote area that includes a fluid reservoir 10, the article is a wound dressing, the channel having a V-shape (fig. 4), the channel includes a thermoplastic material that is vinyl chloride, a pressure sensitive adhesive material 26, a backing layer that includes the adhesive material and a wound dressing 30.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number:

09/961,091 Art Unit: 3772

Claims 41-42, 44 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaefer.

Schaefer discloses in figures 1-8 a medical treatment article, substantially as claimed. However, Schafer doesn't disclose that the channels having the same angle, how deep the channels are or the film being translucent. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the channels disclosed by Schaefer could be fabricated with an angle between 10 to 120 degrees (which the channels appear to be), the channel could be formed of about 5 to about 3000 microns deep and the film could be made of a translucent material. The angle and the depth of the channels recited in the claims are within the scope of Schaefer. The translucent material could be poly vinyl chloride because it is a translucent material that prevents glare. The channel being a silicone is a choice of materials.

Allowable Subject Matter

Claim 40 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 51-54 and 56-60 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Brown whose telephone number is 571-272-4972. The examiner can normally be reached on 5:30 am-4:00 pm Monday-Thursday.

Application/Control Number:

09/961,091 Art Unit: 3772

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia Bianco can be reached on 571-272-4940. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
